

The Adapted NEWS

Thank you for participating in this study on perceived walkability—how residents experience the environment around their homes. It will take approximately 15 minutes to complete, and we ask that you answer as honestly as possible; there are no right or wrong answers, only your unique perspective. As you respond, please keep two key aspects in mind:

- Walking Distances: A short walk is up to 10 minutes (up to 1 KM); a medium walk is 11–20 minutes (Up to 2 KM); and a long walk is anything over 20 minutes (beyond 2 KM).

- Access: When evaluating access to services or facilities, think beyond just physical distance. Consider whether a place is truly usable for you—taking into account factors such as affordability and personal preferences.
